

Skeleton Grapple Rock Bucket

An excellent addition to any farm or land owner. The Skeleton Grapple Rock Bucket is engineered to pick rocks and debris from the soil with the added feature of independent grapples to secure a variety of materials. Gusseted tines make this attachment versatile for rooting and back dragging as well.

Lift large logs and odd shaped material

Curved at the back of the bucket to help prevent material like rocks or boulders from rolling forward

38.75" wide opening to accommodate virtually any debris
